Emory Family Medicine presents

The Lifestyle Clinic

The Lifestyle Clinic is a medical visit in a group setting. This clinic will involve 10-15 patients all with chronic health conditions. Treatment will be centered on health promotion, disease management and lifestyle change.

The benefits of group medical visits:

- Allows us to focus on your needs in a dynamic, interactive setting
- Brings patients with common needs together with their medical team
- Gives you more time with your medical team than with a typical individual appointment (90-120 minutes as compared to 15-20 minutes)
- Can improve health behaviors
- Can increase patient satisfaction with doctor’s visits and wait times
- Can increase your confidence in managing your medical conditions and life
- Gives every patient the opportunity to be a role model to someone else
- There is time to discuss your goals and needs and strategize how to meet them

*Please speak with your healthcare provider about a referral to this clinic.
